

This instruction is only for Windows XP 32 bit

## Downloading the Dormer Product Selector

(Installing a new or upgrading an older version)

1. Create a temporary folder (eg. "temp") on your desktop.
2. Visit [www.dormertools.com](http://www.dormertools.com) and click on your language.
3. In the left hand menu click on "**Product Selector**".

4. Click on the link "**click here**" to start the download

### DormerProductSelector 2009

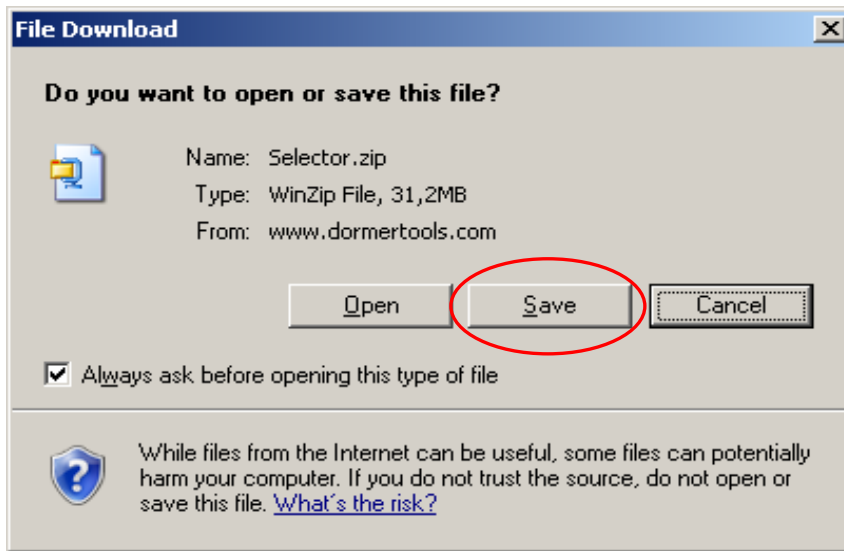

Last Update 23/10/2009

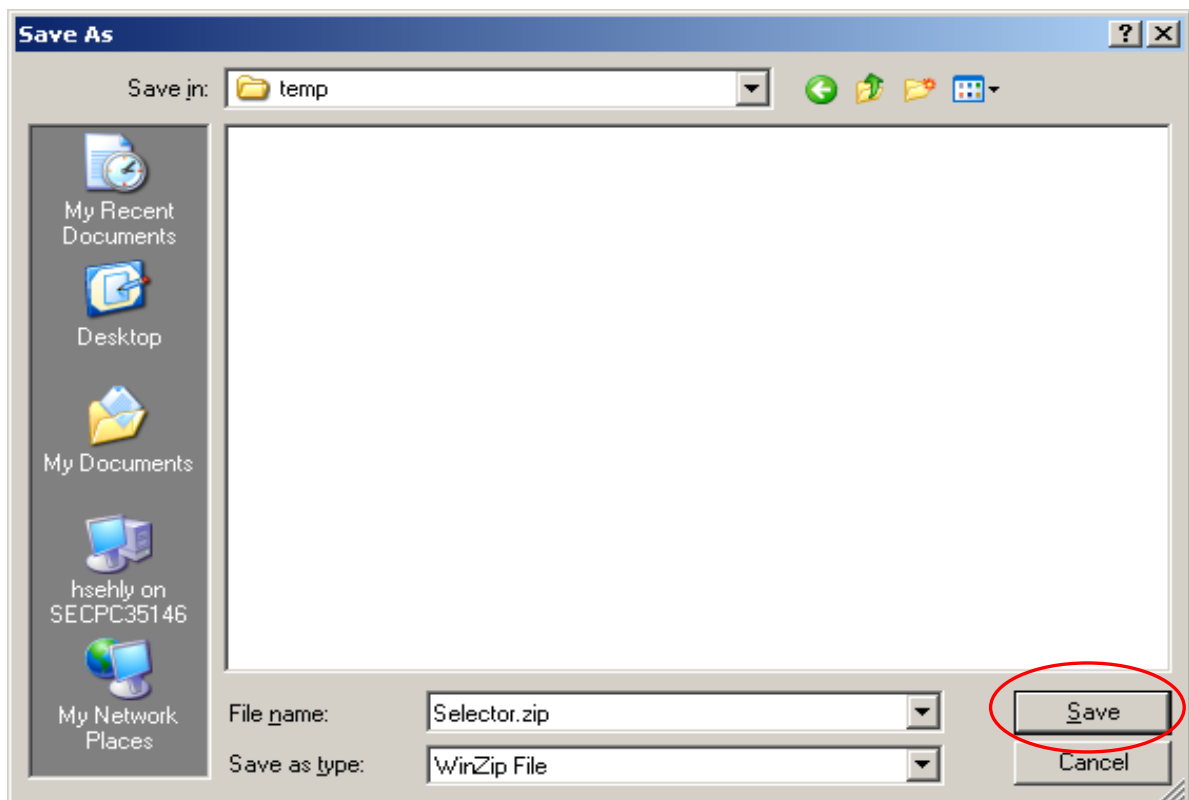

You can download the new version of Product Selector [click here](#).  
The file is 21 Mb and it could take some minutes for the download

Instructions to download and install:  
You will need WINZIP to extract the files once downloaded.  
After a successful download and unzip, open the folder and run Start to install.

5. Click on "Save".

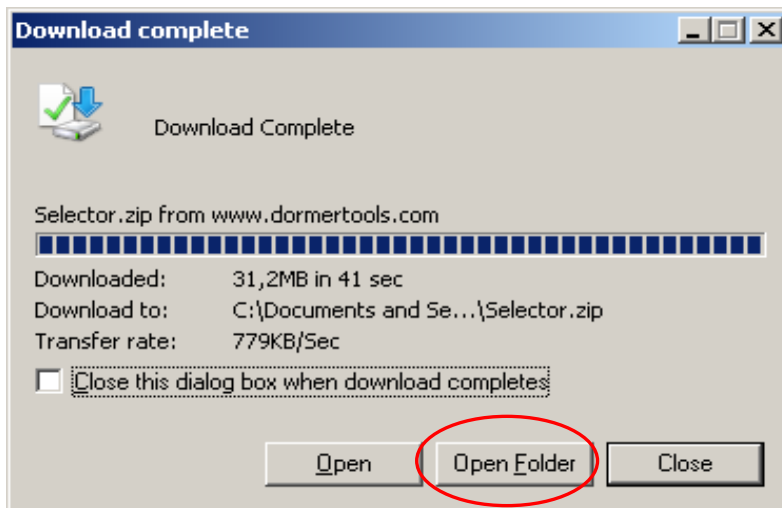

6. Select the folder "temp" you created and then click on "Save"

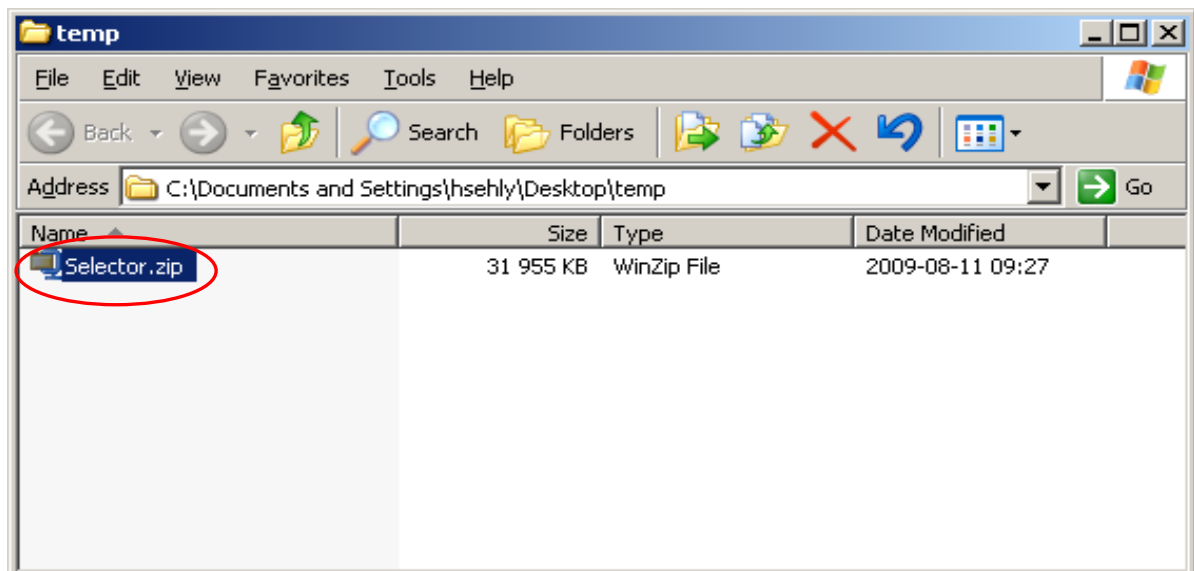

7. The download will begin...

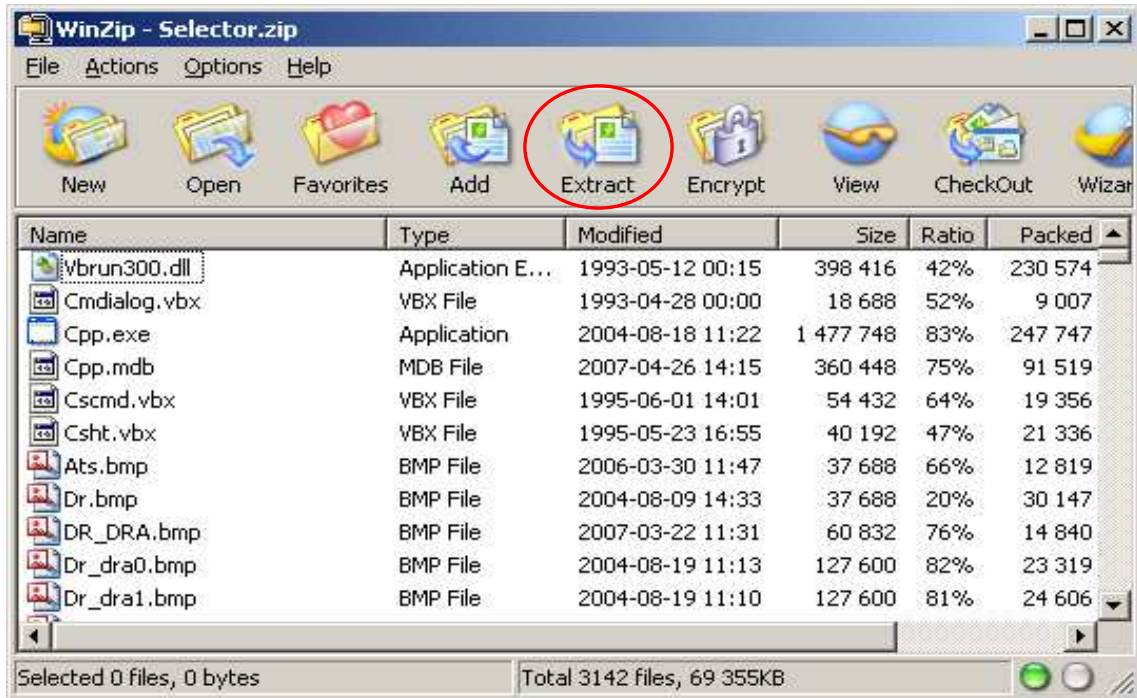

8. When the download is complete, click on "**Open Folder**"

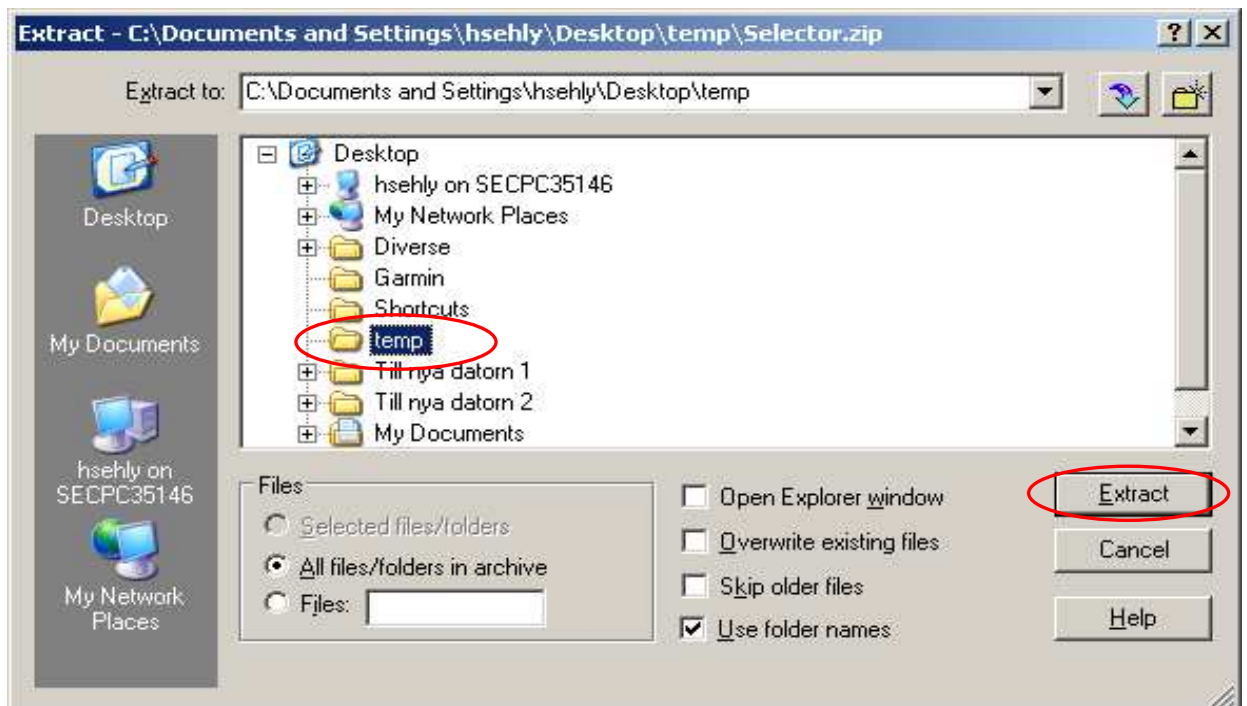

9. Doubleclick on "**Selector.zip**".

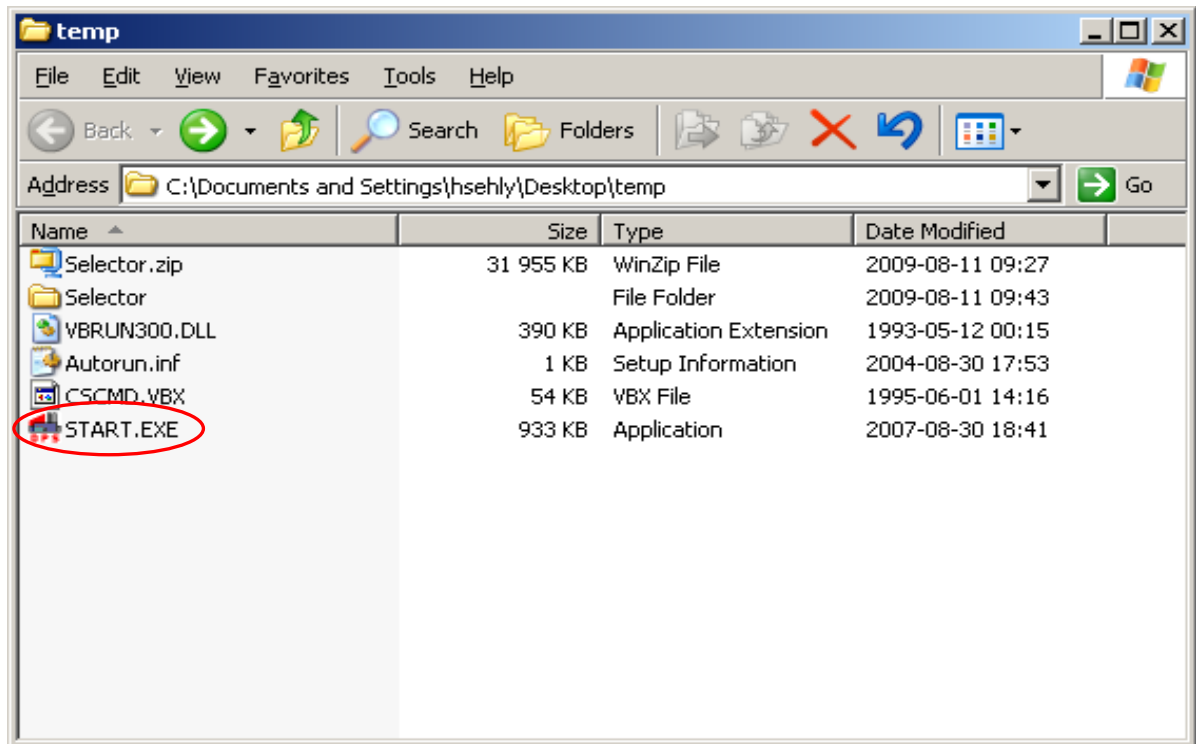

10. Click on "Extract".

11. Select the folder "temp" again and click on "Extract".

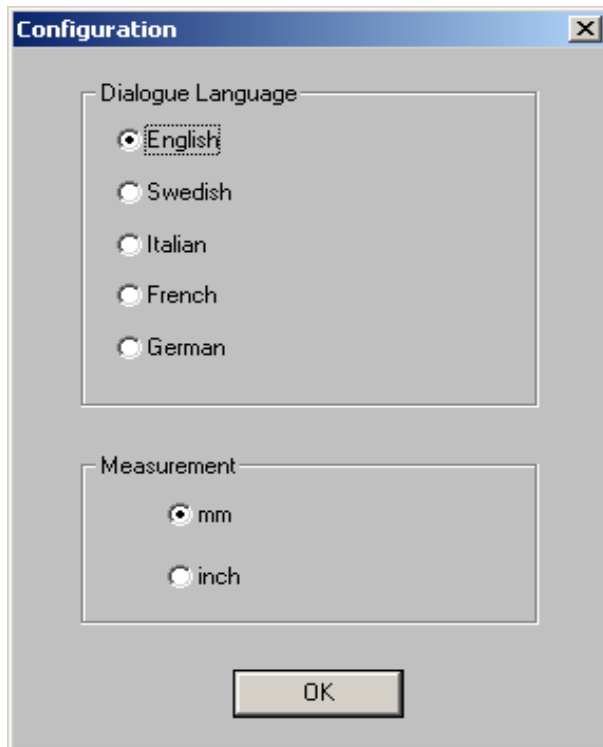

12. When the files are unzipped, open the folder "temp" and double click on "START.EXE"

13. Select your language and click on "Install the Selector"

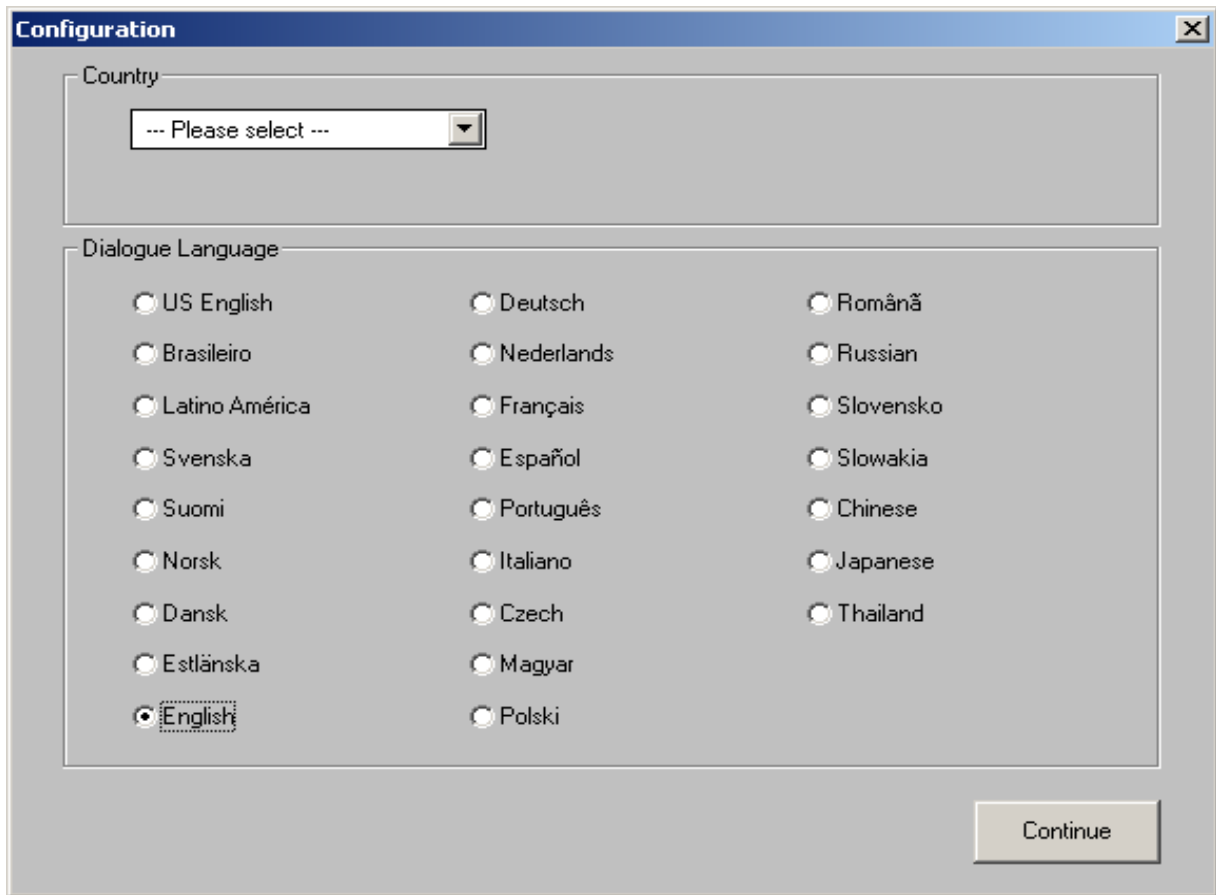

14. Select your Dialouge language and metric or fractional

15. At the next window click on "**Install**".

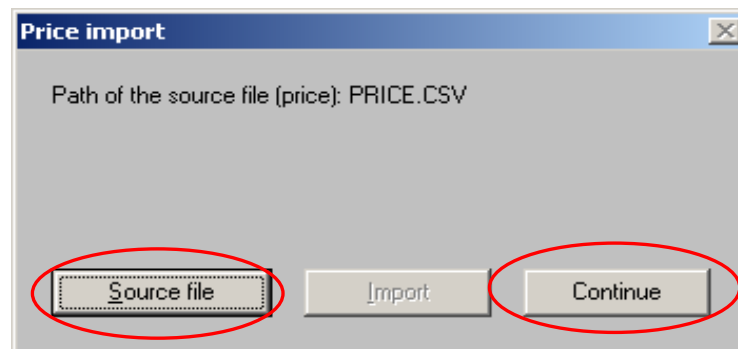

16. If you are upgrading from an older version, a message will say the older will be overwritten. Click on "Install update"

17. Select your Country and Dialogue Language, then click "**Continue**".

18. This dialog asks for the path to the price file. If you have a file and know the path click "**Source file**", if not click "**Continue**"

*(the price file can be added after the Product Selector is installed)*

The installation of the Product Selector is complete!

The folder "temp" which you created can now be deleted.
